Clock Pallas Ring 10 local

Opening balance	Credits	Debits	Closing balance
49,737,134 s	**+145,066 s**	**-1,557,799 s**	**48,324,401 s**

Date	Description	Amount (s)	Balance (s)
02 Jan	ATM withdrawal: Venus	-86,400	49,650,734
	You take days from the machine at Venus rather than from the counter, always the smallest denomination it offers. The officer at Hall E asked whether this is a preference or a principle. You said it was a habit, which is the same thing with less paperwork. Ref. CIBT-3015-58F5-3		
14 Jan	Slippage fee (Venus, 2 transfers)	-1,200	49,649,534
	Slippage fee corrected. The 2 crossings on last month's statement were counted by the Venus relay's clock, which had been reset without notice; the Head Office count is used instead, and the difference of 0.30 seconds has been credited. Ref. CIBT-3015-400C-6		
16 Jan	Transfer to own account: Venus	-1,297,399	48,352,135
	A sundry item of 10 seconds has been carried in the suspense account since 3010, with no holder's name against it. It is not your item, and you are asked to leave it alone, which you have. Ref. CIBT-3015-3A76-6		
18 Jan	ATM withdrawal: Venus	-172,800	48,179,335
	The 18th line was keyed as a deposit when it was a withdrawal, and the sign was carried into the balance. The balance has been restated. You neither gained nor lost anything that day, though the paper did for a while. Ref. CIBT-3015-86AF-6		
31 Jan	Interest at 3.50% APY	+145,066	48,324,401
	The interest is 17 seconds larger this period, which is the sum of the seconds you did not withdraw last period. The Teller asked whether you had been counting them. You had, and she is satisfied the arithmetic is yours. Ref. CIBT-3015-731B-2		

Closing balance, month by month

February 3014 January 3015

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
