Opening balance	Credits	Debits	Closing balance
20,554,139 s	**+556,164 s**	**-113,477 s**	**20,996,826 s**

Date	Description	Amount (s)	Balance (s)
03 Aug	Slippage fee (Phobos, 9 transfers)	-2,700	20,551,439
	Your 9 crossings waited at the Phobos relay for 31 Standard days while a new operator asked the relay for its own reading before touching anything. The reading was written on the transfer slip, and the slip is the only record of it. The crossings have since gone through, and the slippage is charged for the crossing and not the wait. Ref. CIBT-2996-2C0A-8		
07 Aug	Turbulence Cover	-24,377	20,527,062
	Turbulence on the Phobos run is measured by a gauge on the quay, read under the clatter of a sorting drawer being closed, and reported in sols. The claims desk converts the reading to minutes and back again for the file. The gauge has never disagreed with itself. Ref. CIBT-2996-838E-0		
16 Aug	ATM withdrawal: Phobos	-86,400	20,440,662
	You take One Standard day from the Phobos machine each Standard week and leave the change in the slot, where it is kept for you until the following week. The Teller has counted the change on eleven occasions and found it correct on each. Ref. CIBT-2996-D6A1-4		
22 Aug	Deposit: Hall E	+473,948	20,914,610
	The coins on this slip were checked by the auditors against the window's own tally and found one short. The coin turned up under the blotter, where it had rolled, and the two counts now agree. Ref. CIBT-2996-4240-0		
31 Aug	Interest at 4.80% APY	+82,216	20,996,826
	For the auditors: the interest on this account for 2993 was reconciled to the ledger on the 31st, and the reconciliation agreed to the second in both directions. Ref. CIBT-2996-D785-0

September 2995 August 2996

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
