Period 1–31 August 3002
Branch Hall E, Pallas Ring 10
Clock Pallas Ring 10 local

Opening balance	Credits	Debits	Closing balance
8,339,044 s	**+148,482 s**	**-422,515 s**	**8,065,011 s**

Date	Description	Amount (s)	Balance (s)
10 Aug	Payroll credit: Kepler Ring Hydroponics	+123,465	8,462,509
	The crew at The Belt are paid in shifts by Kepler Ring Hydroponics, and the remittance reaches Hall E already converted. A Teller who has checked the conversion by hand twice reports that it is correct, and that her first figure was the right one. Ref. CIBT-3002-0CCE-8		
14 Aug	ATM withdrawal: The Belt	-259,200	8,203,309
	Withdrawn in full before the bonus was paid. The bonus from Kepler Ring Hydroponics, posted on the 14th, appears on the next statement, and the Bank has made no comment on its size. Ref. CIBT-3002-4F89-2		
20 Aug	Transfer to joint account	-74,079	8,129,230
	The Teller noticed that both signatures on the mandate were written with the same pen. She asked whether this had been a decision or an accident, and was told it was a Tuesday. Ref. CIBT-3002-D0B0-7		
24 Aug	Transfer to own account: The Belt	-89,236	8,039,994
	A sundry line from The Belt is written in the local word for an hour, which the Bank converts to shifts without comment. The conversion is at the local rate, and the word is printed in brackets so the station can recognise its own word on the page. Ref. CIBT-3002-7F2D-0		
31 Aug	Interest at 3.60% APY	+25,017	8,065,011
	You keep a figure in pencil on the back of each slip and check the interest against it before the statement is opened. The two have agreed for 5 years. The officers no longer ask to see the pencil and have begun to ask after the lead. Ref. CIBT-3002-7D72-5

September 3001 August 3002

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
