Date	Description	Amount (s)	Balance (s)
04 Jul	ATM withdrawal: Montréal Sector	-172,800	866,840,683
	Posting of the Montréal Sector withdrawal was delayed 30 days, because the relay was restarted for a calendar change. The machine remembers the sum, the Bank remembers it too, and the two have agreed on it. Ref. CIBT-3003-ED44-9		
24 Jul	Memory Vault: box 66-280, quarter	-259,200	866,581,483
	You visit box 66-280 on the 24th of the month, sit for 57 minutes, and leave without withdrawing anything. The custodian has chosen to regard this as an appointment. Ref. CIBT-3003-A5FB-2		
26 Jul	ATM withdrawal: Montréal Sector	-259,200	866,322,283
	The Teller counted the notes twice at the window, once for you and once because you had asked how many there were. The figure was the same both times, which she describes as the only pleasant surprise of the morning. Ref. CIBT-3003-0302-5		
27 Jul	Deposit: Hall E	+24,250,349	890,572,632
	The figure was keyed in 280 d 16:12:29 and posted as 24,250,349, the two describing the same sum in different units. The Bank has checked the conversion, and it holds. The statement now shows both, so that either may be read by the holder. Ref. CIBT-3003-7340-4		
30 Jul	Slippage fee (Montréal Sector, 9 transfers)	-8,100	890,564,532
	The crossing waited 31 days because the Settlement Reserve audited its own reserve before it would release the seconds to the relay. The audit found the reserve in order, as it always does, and the seconds went across on the 30th. Ref. CIBT-3003-2C03-4		
31 Jul	Interest at 3.40% APY	+2,456,538	893,021,070
	Most people never look at the working. The Bank publishes it so that anyone who wants to can check it, and most who do then go back to bed. Ref. CIBT-3003-CADA-3
