Date	Description	Amount (s)	Balance (s)
05 Aug	ATM withdrawal: Ganymede	-172,800	290,380,045
	A withdrawal at Ganymede was held while the machine waited for the local branch's note of the day's count, which came up on the afternoon relay. The count matched the machine's to the same cycle. Ref. CIBT-2986-8FD7-6		
09 Aug	Slippage fee (Ganymede, 8 transfers)	-2,400	290,377,645
	The seconds on this line have been traced to an account with no holder's name on it, which the internal audit has met before and filed under the heading it uses for that kind of thing. The fee is correct; the account is not ours to explain. Ref. CIBT-2986-E77E-5		
20 Aug	Deposit: Hall E	+17,387,108	307,764,753
	This deposit was found under the counter mat for 30 days, where a clerk had put it to keep the draught out. The mat has been inspected and contains no other deposits, which the auditors describe as the mat's only finding. Ref. CIBT-2986-0B32-2		
27 Aug	ATM withdrawal: Ganymede	-86,400	307,678,353
	Note to the auditors: the One Standard day withdrawal at Ganymede was entered twice in the first run of the month, once from the machine and once from the relay's copy. The duplicate has been struck, and the account has not been charged twice for the same cash. Ref. CIBT-2986-577D-8		
31 Aug	Interest at 4.80% APY	+1,162,211	308,840,564
	The Ceres branch counts its interest in lengths of the asteroid's own day, and converts the total to ours on the morning the day ends. The conversion is printed in small type beside the sum, and you have read it every month without remark. Ref. CIBT-2986-74C8-7

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
