Period 1–31 March 3000
Branch Hall E, Pallas Ring 10
Clock Pallas Ring 10 local

Opening balance	Credits	Debits	Closing balance
593,036,436 s	**+2,075,627 s**	**-21,382,586 s**	**573,729,477 s**

Date	Description	Amount (s)	Balance (s)
03 Mar	ATM withdrawal: Svalbard	-172,800	592,863,636
	Withdrawal requests at Svalbard are rounded to the nearest five seconds before the machine counts them, and an odd request is rounded up by the machine and down by the branch. The machine has been asked to agree with the branch, and has said it will try once the branch does. Ref. CIBT-3000-C4C4-3		
10 Mar	Transfer to own account: Svalbard	-18,839,466	574,024,170
	Agreed at Hall E on the 10th, but the branch was closed for the calibration of its clock, and the paper spent 29 days in the calibration room, where it was found to be correct. Ref. CIBT-3000-5607-5		
15 Mar	Transfer to joint account	-2,370,320	571,653,850
	Interest on the joint balance is rounded in the holders' favour when the sum comes out even and against them when it comes out odd. The Bank calls this a fair division of the arithmetic, and the holders call it a quarrel they have agreed to lose in turns. Ref. CIBT-3000-9ADA-0		
31 Mar	Interest at 4.20% APY	+2,075,627	573,729,477
	Interest on the Svalbard balance was paid in 0.974 days and the rest in our seconds. The posting day is the Head Office's, and the officer there reminds depositors that the second is a little longer on that world than they might expect. Ref. CIBT-3000-0658-6

April 2999 March 3000

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
