Period 1–31 March 3003
Branch Hall E, Pallas Ring 10
Clock Pallas Ring 10 local

Opening balance	Credits	Debits	Closing balance
115,974,210 s	**+2,668,635 s**	**-360,966 s**	**118,281,879 s**

Date	Description	Amount (s)	Balance (s)
11 Mar	ATM withdrawal: Mars Station	-259,200	115,715,010
	You have never used the machine at Mars Station after dark. Every withdrawal falls between the first and the last hour of the Pallas Ring 10 day, which the Bank has checked against the log and found to be so. Ref. CIBT-3003-CBD5-2		
17 Mar	Slippage fee (Mars Station, 2 transfers)	-600	115,714,410
	You have never sent a transfer on a Sunday, and the relay, which does not keep Sundays, has asked the Bank to record that it has not been asked to. Ref. CIBT-3003-CA33-2		
17 Mar	Turbulence Cover	-14,766	115,699,644
	The delay was entered as 47 minutes on the carrier's form and as 47 hours on the terminal's. The difference was traced to a clerk who had not been told the form had changed. Ref. CIBT-3003-0FBD-0		
18 Mar	Deposit: Hall E	+1,398,592	117,098,236
	The deposit was dated the day it was sealed, not the day it was posted, and the posting was held 29 days until the envelope had come up from the sealing room. The holder had meant the sealing date, and the envelope agrees. Ref. CIBT-3003-01DE-2		
26 Mar	Payroll credit: Titan Methane Works	+796,482	117,894,718
	The remittance advice from Titan Methane Works shows the wage twice, once as earned and once as paid, and the two figures differ by 0.30 seconds. The difference is a fee the firm charged itself for paying early. The auditors have been asked whether a firm may pay itself. Ref. CIBT-3003-D619-6		
27 Mar	ATM withdrawal: Mars Station	-86,400	117,808,318
	A withdrawal at Mars Station was posted to a branch account with the same number and a different check digit. The entry has moved to yours, and the other account has been reconciled to the second. Ref. CIBT-3003-C1AC-6		
31 Mar	Interest at 4.90% APY	+473,561	118,281,879
	Earned at Mars Station, the interest crossed to us in 30 days and came out the same at the far end. Nothing was added on the way, which the relay that carried it regards as the purpose of a relay. Ref. CIBT-3003-BF42-6		

Closing balance, month by month

Highest 118,281,879 s · lowest 85,564,411 s

April 3002 — March 3003

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
