Date	Description	Amount (s)	Balance (s)
15 May	Transfer to joint account	-863,909	187,400,031
	The transfer posted on the 15th came through the Ceres Ring Assay Office's office 28 days late, because the office sent one holder's share before the other's and both holders asked the Bank to wait for the second. The incomplete figure has been struck. Ref. CIBT-3003-2299-2		
18 May	Deposit: Hall E	+15,874,992	203,275,023
	The note with this deposit from the Ceres Ring Assay Office asked that the sum be called a bonus. The Bank has entered it as a deposit, which the note's author has agreed is the same word on this side of the counter. Ref. CIBT-3003-552D-2		
24 May	Turbulence Cover	-13,788	203,261,235
	Turbulence Cover pays by the minute, rounded down on the carrier's clock. The carrier keeps its clock to the second, so the 49 minutes shown is the figure paid, less the second the carrier keeps for itself. Ref. CIBT-3003-733A-0		
29 May	Slippage fee (Venus, 9 transfers)	-5,400	203,255,835
	You arrive at the relay's hatch a little before it opens and wait until the first light falls on the sill, after which you send the transfers in a single movement. The operator has begun to open the hatch on the first light, to save you the wait, and has been told it need not. Ref. CIBT-3003-CC2C-9		
31 May	Interest at 4.60% APY	+721,678	203,977,513
	You never read the interest line on the way out of the branch. You read it on the step, in the light, and then come back in to confirm that it still is. Ref. CIBT-3003-CA13-0

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
