Date	Description	Amount (s)	Balance (s)
05 Aug	ATM withdrawal: Ganymede	-259,200	863,751,978
	On the first working day of each month you draw 3 Standard days from the Automated Temporal Machine at Ganymede, always the same sum, and always leave the second note in the slot for the next holder. The engineer who services the machine has begun to set that note aside for you. Ref. CIBT-2977-5424-4		
10 Aug	Deposit: Hall E	+36,560,607	900,312,585
	An earlier line showed this deposit as made at night and posted in the morning. The figure was restated with the old figure struck through and still legible, and the entry moved to the hour the window was actually open; the night safe had no part in it. Ref. CIBT-2977-DDB9-6		
12 Aug	Slippage fee (Ganymede, 5 transfers)	-1,500	900,311,085
	The crossing was entered 30 days late, because the relay's clock had been running on the far station's day for the whole week. The clock has been put back to ours, and the fee is charged on the day you sent the transfer, not the day the relay believed it was. Ref. CIBT-2977-2A35-6		
16 Aug	ATM withdrawal: Ganymede	-86,400	900,224,685
	A withdrawal of One Standard day keyed at Ganymede on the 16th is dated the following day, since the machine keeps the concourse's day and not the counter's. Nothing is owed on the difference, and the interest runs from the day you asked. Ref. CIBT-2977-5C09-2		
31 Aug	Interest at 3.20% APY	+2,304,029	902,528,714
	Titan Methane Works pays a small sum into this account each month, which it calls interest and the Bank calls a receipt. The two words have been agreed to refer to the same second. Ref. CIBT-2977-D7DC-5

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
