Date	Description	Amount (s)	Balance (s)
05 Jul	Slippage fee (Montréal Sector, 9 transfers)	-8,100	13,238,782
	The Bank rounds your fee down when it is charged to you and the relay's share down when it is paid out. That leaves a surplus of 0.952 of a second, which has no account and no name. Ref. CIBT-2989-BA70-4		
21 Jul	Deposit: Hall E	+703,328	13,942,110
	Mars deposits made on the Standard day are credited in the Mars sol that follows, which is longer, so the holder's money earns a little more on the red planet than it would on ours. The Mars desk has asked that this be called a pleasantry. Ref. CIBT-2989-B195-5		
24 Jul	Turbulence Cover	-23,001	13,919,109
	The Teller has asked that the premium be described as modest, since she was the one who had to read the sum aloud at the counter. Ref. CIBT-2989-69F6-5		
31 Jul	Interest at 4.80% APY	+52,987	13,972,096
	"The interest is the easy part," the Teller says. "It is the balance that surprises people, and the balance only does what the interest tells it to." The same depositor has heard this for 8 years and has never disputed it. Ref. CIBT-2989-AC36-7

Balances accrue every second of every day by the Standard clock and are shown in Standard Galactic Seconds. Transfers between branches whose clocks disagree carry the slippage fee shown in the Daily Slippage Report for the day of transfer. Deposits are insured by the Temporal Deposit Insurance Corporation up to 10,000 years per depositor, per epoch.
