Date	Description	Amount (s)	Balance (s)
16 Jun	Deposit: Hall E	+26,748,626	683,331,334
	Deposits in this account are kept to the nearest whole second, so the 0.974 left over from this one has gone into the tin on the counter, where it sits with the others until someone asks for it. Nobody has asked, and the tin is getting heavy. Ref. CIBT-3026-29D6-2		
20 Jun	Transfer to joint account	-1,814,424	681,516,910
	The transfer from the Authority Records Office should have reached the joint account on the 20th, but its office kept a clock a few hours behind ours, and the funds were dated the following day. Both holders have been told the arithmetic. Ref. CIBT-3026-87B5-3		
20 Jun	Turbulence Cover	-7,787	681,509,123
	A standing claim is filed each month for the cover's minimum, so the policy is never left without a month on the books. No delay has ever been paid under it, and the underwriters describe it as the steadiest line in their account. Ref. CIBT-3026-7415-2		
29 Jun	ATM withdrawal: Phobos	-86,400	681,422,723
	The Audit Committee sampled this line and asked for the machine's own timestamp to be set against the branch's. The two differ by 18 seconds, which is inside the tolerance set for the concourse and is recorded as tolerated, not as explained. Ref. CIBT-3026-C11C-5		
30 Jun	Interest at 3.30% APY	+1,805,602	683,228,325
	Interest for the Pallas Ring 10 day was posted an hour late. The relay that carries the close stopped to wait for the Authority's notice of the reference second, which arrived on the 30th, and the posting followed it. The hour has been paid at the posted rate. Ref. CIBT-3026-97E6-8
